CASE STUDY

INSTALLATION DATE: February 2018

END USER: Ibaizabal Group – Crude Oil Tanker "Montesperanza"

LINES SIZES AND MATERIAL: 44.5mm and 57mm - CuNi 70/30

SYSTEM MEDIUM: Heating Coil Piping (Steam and Condensate) - 7 Bar (102 PSI)

SYSTEM TEMPERATURE: 170°C (338°F) LOCATION: Ferrol, Spain (Navantia Shipyard)

SPECIAL COMMENTS OR NOTES:

Repair leaking socket weld joints that are leaking steam/ condensate inside fuel tanks on the vessel. Due to the risk and fire and explosion in a confined space with flammable fumes the non-welded PYPLOK fitting was used to execute the repairs quickly and safely.
