

CASE STUDY

The Pyplok logo features the word "Pyplok" in a bold, white, sans-serif font. The letter "o" is replaced by a green circular icon with a stylized sunburst or gear-like pattern. A small "TM" trademark symbol is positioned to the upper right of the "k".

Pyplok™

INSTALLATION DATE:

August 2022

END USER:

Woodside Energy Trinidad

LOCATION:

Angostura Platform, Offshore
Trinidad & Tobago

LINES SIZES AND MATERIAL:

2" SCH80, Carbon Steel

SYSTEM MEDIUM:

Diesel Transfer Line

SPECIAL COMMENTS OR NOTES:

Trinidad Inspection Services "TIS" which is a Pyplok® certified installation company had to repair multiple areas of corroded diesel transfer lines offshore on the operating Angostura Platform. Some of these lines were located in hard-to-access and over-water areas and where scaffolding was not possible. The piping was isolated short term but residual liquid would be present so welding was not an option. TIS utilized their rope access team along with Pyplok® to quickly and safely replace and re-connect the 2" SCH80 Carbon Steel pipes. Utilizing Pyplok® which does not create sparks or heat eliminated fire and explosion risks offshore while quickly connecting the pipes for a fast repair and minimal downtime.
